Good Care Aids Spirit As Well As Health, Says State Health Chief

"GOOD CARE DOES as much for the spirit as it does for health," said Michigan Health Commissioner Dr. Albert E. Heustis recently as he called for studies on the possible benefits of improvements in care for the aged.

"If you think about your own old age, you know you don't want to end up in a cramped room, with indifferent care, tasteless meals and few visitors," he said.

Fortunately, most of the older folks in Michigan nursing homes or homes for the aged get good care.

Heustis made a plea for increased family and community support to make lives of the older persons more interesting.

"Most nursing homes and homes for the aged are doing their best to improve, and have made a great deal of progress," Heustis said. "But they need more family and community support to make old houses into new homes for older people."

More than 16,000 patients are in 568 licensed homes in Michigan, the department said.

Some of them are senile. Others are paralyzed and bedfast. Some are blind. Still others hobble about on crutches or use canes to help them make their painful way.

But others are full of life and vigor despite their advanced age. All, no matter what their physical condition, need someone to show an interest in them. Not only do they need interest from family and community, but they need financial help in many cases.

"Bargain basement rates won't support high quality nursing services," Heustis said.

"Patients come to these homes with varied backgrounds, health problems, tastes, habits and expectations, but all need good care in a home-like atmosphere," he said.

What many of them need most is somebody anybody to care.

FATIGUE MAY BE second to carelessness as a cause of accidents, Michigan has a relatively low fatality count—14 dead in a three-day period over the long Independence Day weekend—but a pattern too the deaths might indicate tiredness is a villain in many of the cases.

On the first evening of the weekend (Friday), when drivers were fresh and on the way to a holiday destination, only one person was killed. On July 2 (Saturday), two died on highways.

On the next day, the third day of the holiday weekend, four persons were killed in auto accidents.

But on July 4 (Monday), the final day of the weekend, when the stream of exhausted weekenders was heading home, seven persons died in seven fatal accidents on Michigan roads.

PART OF THE PAY for a Michigan motel owner must be in the satisfaction of his job.

A Michigan State University survey showed the average earnings for a motel to range between \$3,000 for a 10-unit operation to about \$5,800 for a 20-unit motel.

Robert McIntosh, tourist and resort specialist who conducted the survey, said most of the state's 7,700 motel operators don't stay in business solely for the money.

The dollar which the motel owner gets for his facilities goes largely for expenses, McIntosh said.

About 40 cents of the average dollar goes for operating expenses—laundry, fuel and water, maintenance and supplies. Another 30 cents of the dollar is eaten up by fixed costs—depreciation, insurance, taxes and the like.

The motel owner gets about 30 cents of the dollar for his profit, then. But most of them like their job enough to stick with it, and many times additional income comes from sideline operations.

Three Rogers Brothers Graduate In June

His brother Fred Rogers received his D. S. degree from the University of Michigan this June and will return this fall to enter the Dental School at the University.

The third brother, Douglas Rogers, graduated from the Pontiac Central High School in June and has been accepted for enrollment at the University of Michigan this fall. The boys are sons of Dr. and Mrs. Waldemar O. Rogers of Pontiac, Michigan, former Grayling residents.

City of Grayling
(Continued from Page 1)

for street, sewer and water mains where needed to extend the service to a greater part of the city and US-27 was being widened and the city had to bear part of the cost and also the city had no place to house their equipment and so a garage had to be built.

In 1948 another bond issue was made to provide these services. The amount was for eighty-two thousand dollars—\$82,000.00. Many thousand feet of water and sewer lines were laid during 1948 and 1949.

The electric system continued to show greater and greater usage of electric current by the community so another unit was purchased in 1952 on title retaining certificate for the amount of \$118,000.00. This was one of the newer type engines. The growth during the past years has been phenomenal and has grown beyond the engineers' expectations. This again placed us in the position of protecting the plants operation by purchasing another unit in 1956.

We again are going to have to purchase another unit to help carry and protect the plant. The past twenty years have seen the sales of electricity grown in Grayling from the area from 1940 of 1,192,000 KW to 1958 the ending of 7,305,000. In 1958 the council employed an engineering firm to survey and give estimates and recommendations for improving our streets, sewers, water main, curb and gutter, sidewalks and also a new City Hall. I had made a preliminary study of our needs in 1957 and the original study came up with approximately the same cost figures namely about one million two hundred thousand dollars for these improvements.

In 1959 we issued forty-two thousand dollars (\$42,000.00) of motor vehicle revenue bonds for Michigan Avenue to better meet the needs for our new Mercy Hospital and to make a better entrance appearance from the new limited access highway now in the process of being built.

Any further street improvement will have to come from higher taxes and special assessments of the adjoining property owners where the work is being done and who will directly benefit in the new improvements to be made.

The following tabulation is for all the bond issues I have mentioned their term of issue, when they will be finally paid for, the original issue, the cost of interest and the rate of interest paid. I believe your City Councils during these years have exercised very good judgment in their work and believe that they, with the help and understanding of the citizens of this community can continue to grow and improve our town.

A Big Problem . . .

This country's defense system, along with its power of retaliation in the event of war is based in large part upon foreign bases. These bases, which were built at an enormous cost in money and effort, amount to a ring around the Communist empire. From them American military power could be thrown against any Communist center.

Most of us have assumed that these bases are secure, and that the government agreements which made them possible are permanent in nature. But, according to an article in U. S. News & World Report of July 4, the picture is not bright today. In its words, "All around the world, the military bases upon which the U. S. and its allies depend for defense against Soviet Russia and Red China are in danger."

In part, the danger comes from Communist strategists — but only in part. There are strong forces within allied governments which are opposed to having U. S. military installations within their territories, and which are pressing hard, and sometimes successfully, for U. S. withdrawal.

Our Far Eastern position, for example, depends on our outposts in Japan and Okinawa. As U. S. News observes, "The use of U. S. forces based upon Japan, now is to be subject to possible veto by a Japanese Government. To defense officials, violent outbursts in Japan against these bases raises a question about their future, despite any new rights in the treaty just ratified."

Some of our biggest and most important air bases are in Morocco. Here, too pressure has become so strong that we have agreed to completely evacuate them.

We have already withdrawn all our remaining ground forces from Iceland, at the request of the Icelandic Government.

All our nuclear bombers have been withdrawn from France, and some bases closed in that country. This followed the French Government's demand that it have the right to veto the use of nuclear weapons, which the U. S. Government could not agree to.

Even in England, U. S. News adds, there is dissension. Our bases "are becoming the center of more and more political controversy," one argument being that they needlessly bring Britain into the firing-line and subject her to tremendous dangers. This has not reached the point where there is any immediate question of U. S. withdrawal, but the criticisms are widely quoted in and out of the British press.

So it goes. U. S. News continues, throughout the

PRIVATE INITIATIVE AND FREE ENTERPRISE

world. Difficulties of one kind or another and with varying degrees of intensity are appearing in Libya, Turkey, Norway, Korea, Pakistan and the Philippines. The magazine says: "Trouble thus seems to be cropping up all around for this country's world-wide network of military bases—at a time when Russia's missile threat is growing fast and America's defenses still are geared in large measure to retaliation from bases abroad." What solution will be reached remains to be seen. But it is one more big problem to be added to all the other problems with which the next Administration and the next Congress will have to deal.

Two fish on one bait is what Jappe Smith says happened to him while fishing with a long bamboo pole a large pike struck the bait and immediately started on a bee-line for the boat, faster than the line could be hauled in. With him and his wife on the boat apparently slipped through the gills and was trailing behind. Before landing the 25 inch pike, another smaller pike took the bait, and both were hauled into the boat. If anyone but Jappe were to tell the story we might discredit it. Anyway, here's one for Ripley.
